NORTHFRAME · WEBSITE DESIGN

A website concept for Brandon Welding & Fabrication

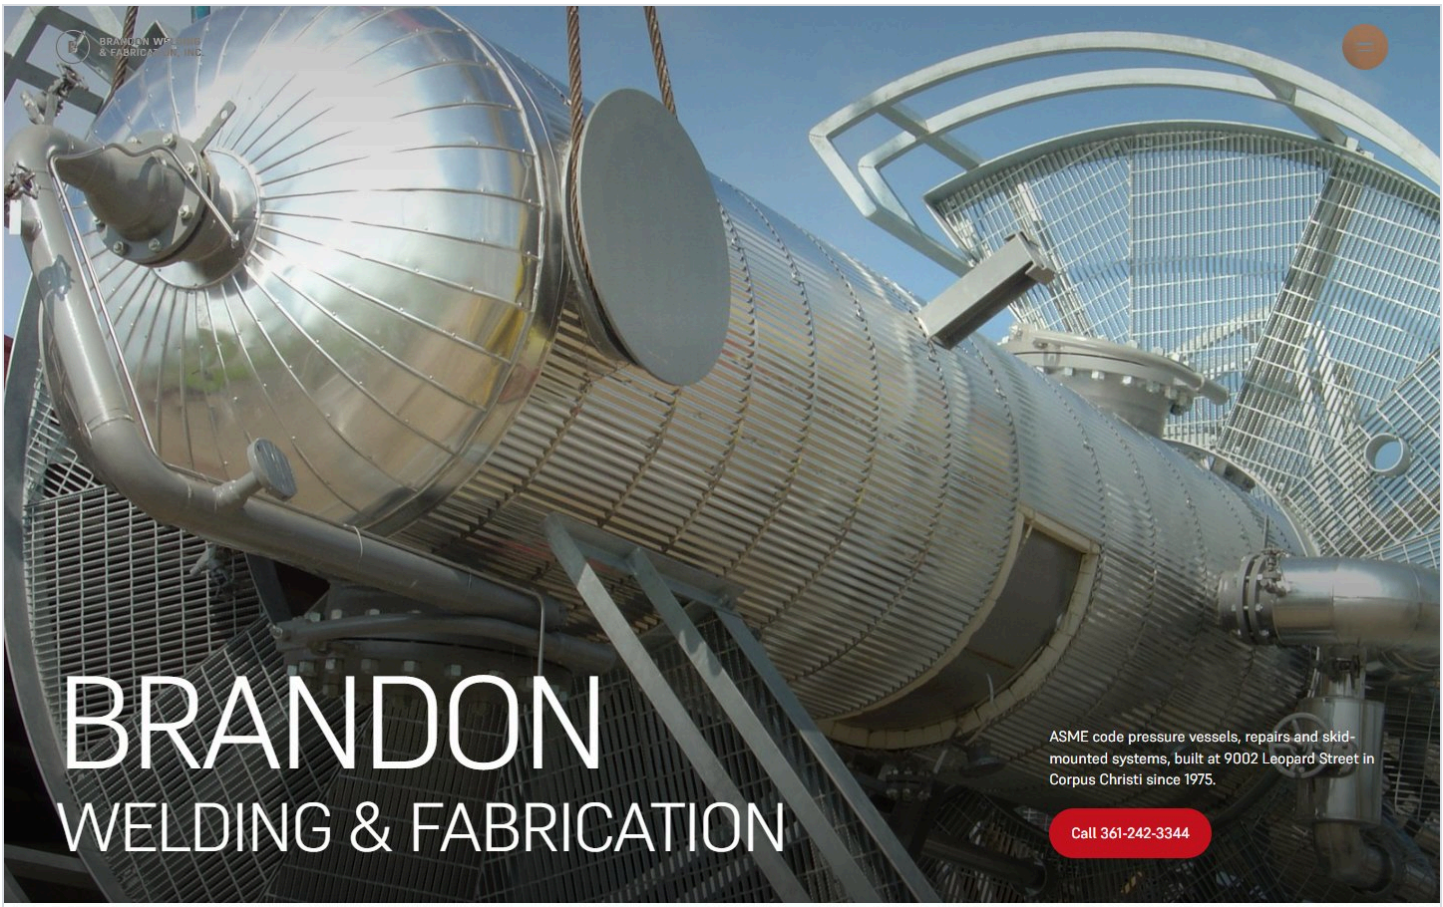

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your vessels in the first screen, with the phone number and the shop address right next to them
- A pressure gauge climbs to 50 years as your ASME and National Board authorizations appear one by one
- Capabilities, project photos and your team, from the president to the office manager

This is a design preview, not a live replacement for your current site. Capabilities, certifications, names and photos come from your current website and would be confirmed with you before anything goes live. Some photos were upscaled for this preview.

ASME code pressure vessels

Built to the ASME code under the company's "U" stamp authorization.

ASME code repairs

Repairs and alterations under the National Board "R" stamp.

Skid mounted systems

Piping, vessels and platforms assembled on one skid, ready to set.

Filter housings

Licensed fabricator of filter housings for Pall Filtration Company.

Fire equipment

Fabrication of fire equipment for industrial customers.

Structural systems

Structural steel for the petrochemical industry and oilfield sites.

STANDARDS

50 YEARS IN BUSINESS

ASME "U" STAMP AUTHORIZED

NATIONAL BOARD "R" STAMP

NATIONAL BOARD AUTHORIZATION TO REGISTER

Founded in 1975 to serve the petrochemical industry with quality products, competitive pricing and on-time deliveries.

PROJECTS

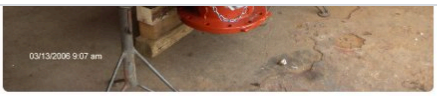

Vessels, skids and piping from the Leopard Street shop.

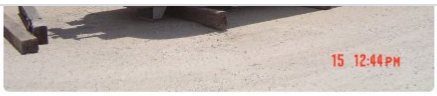

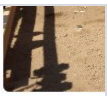

PEOPLE

Stewart
President

Lyn-Dee
Vice-President

Jackie
Material Control Manager

Jennifer
Office Manager

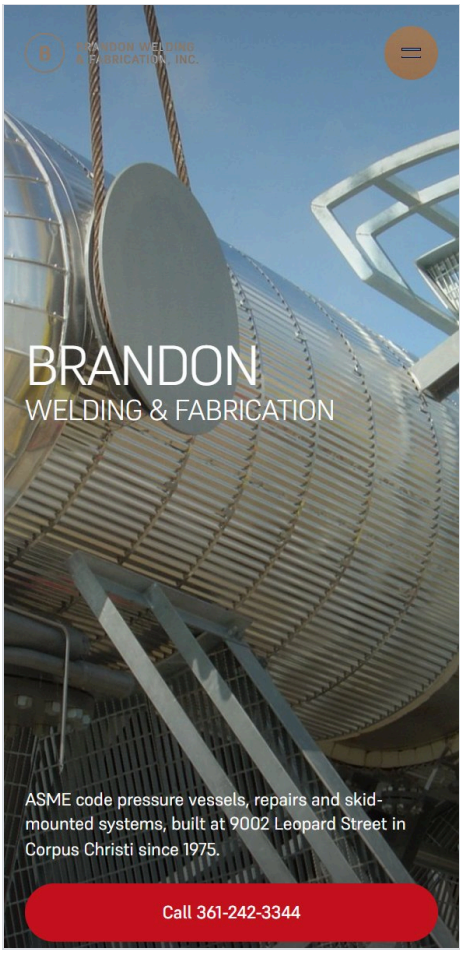

Robert, Shop Foreman, runs the floor.
