NORTHFRAME · WEBSITE DESIGN

A website concept for Fabcon Industrial

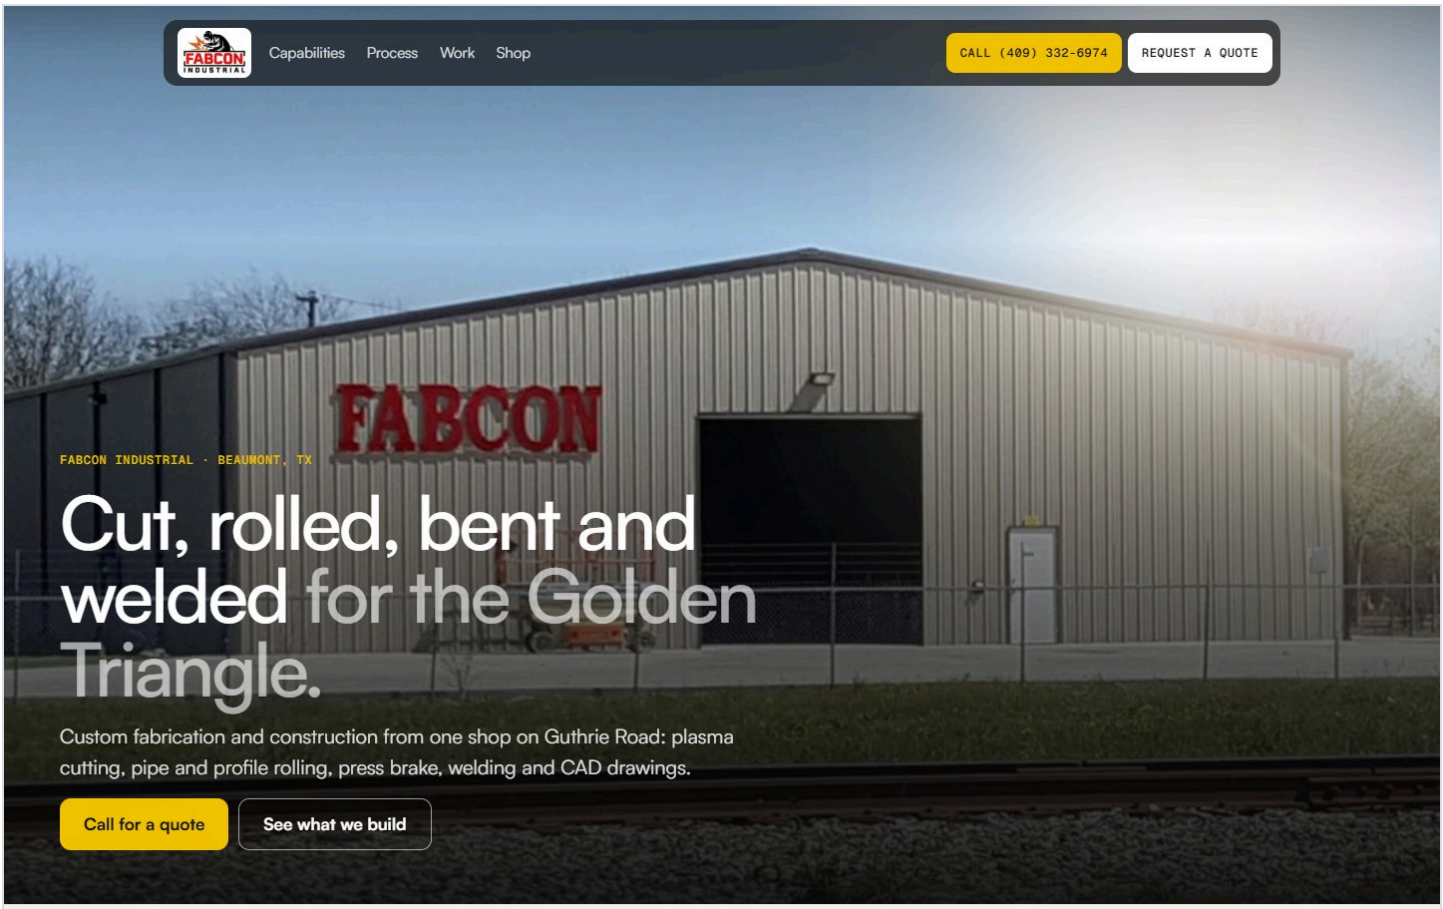

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Calling or emailing a drawing one tap away, with your shop on Guthrie Road in the first screen
- A plasma torch cuts a part out of a steel plate as visitors scroll, from CAD drawing to finished piece
- Cut, roll, bend, weld and deliver as clear steps with your own photos, plus a gallery of recent work

This is a design preview, not a live replacement for your current site. Services, address and photos come from your current website and would be confirmed with you before anything goes live. Business hours are marked "to confirm". Some photos were upscaled for this preview.

Nathanael Gutperl · Northframe

Adalbert-Stifter-Straße 31b, 65232 Taunusstein, Germany

Bring a drawing, a broken part or just an idea. We take it from plate to finished piece.

01 · PLASMA & CAD

Cut to the line

Plasma cutting from our own CAD drawings or yours, for one-off parts and repeat runs.

02 · ROLLING

Pipe, angle and profile

Pipe rolling, angle rolling and multi-profile rolling for rings, bends and curved frames.

03 · BRAKE & WELD

Bent and joined

Press brake forming and welding on multi-arc machines, from guards to stairs and platforms.

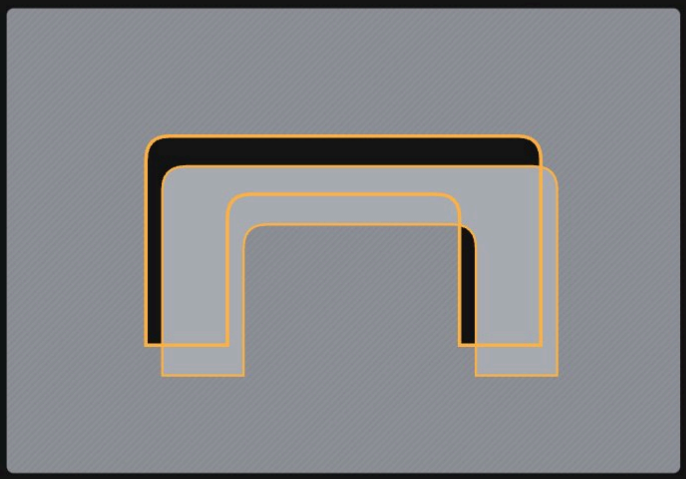

FROM THE PLATE

One line on the drawing. One clean cut in the steel.

- ○ DRAWING IN CAD
- ○ PLASMA CUT
- ● FORMED AND WELDED

From sheet to site

Every job runs through the same shop. Pick a step to see it.

Cut | Roll | Bend | Weld | Deliver

AT THE TABLE

Plasma cutting and CAD

Shapes are drawn in CAD and cut on the plasma table, so the next steps start from a clean, accurate blank.

Recent work

THE SHOP

3142 Guthrie Road, Beaumont

Jefferson County, Texas. The Golden Triangle's partner for custom fabrication and construction.
