NORTHFRAME · WEBSITE DESIGN

A website concept for Midwest Fab & Construction

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your story since 2001 told like a magazine, in the red and blue of your logo, with the crew photo up front
- Your specialties as one list; the matching project photo appears next to each line
- Welding processes and CNC machines on one spec sheet, and the phone number large at the end

This is a design preview, not a live replacement for your current site. History, specialties, names and photos come from your current website and would be confirmed with you before anything goes live.

MIDWEST FAB & CONSTRUCTION

FOUNDED AS
MIDWEST MACHINE &
FABRICATION
2001

10720 E. AMARILLO BLVD.
AMARILLO, TEXAS

Metal fabrication is the specialty. Welding, machine work and general construction come with it, from catwalks to stainless-steel pipelines.

01

A crew that builds the whole job.

Midwest Fab & Construction started out as Midwest Machine and Fabrication in 2001, a shop known for metal fabrication and machine work. Two years later it became Midwest Fab & Construction under Robert Urteaga.

Today the crew fabricates in the shop and installs on site: conveyor systems, racks, catwalks, sanitary piping, ammonia systems and steel structures, with the slab work, sidewalks and general contracting around them.

THE CREW AT THE AMARILLO SHOP

02

What we build

Specialties, as listed by the company. Hover a line to see the work.

01 Conveyor systems

02 Fabricating and welding

03 Catwalk systems and hand-railing

04 Sanitary piping and pipe fitting

05 Sheet metal work

06 Steel structural and equipment installations

07 Railing systems (tracks)

08 Shelving, racks, tables and stands

09 Slab work, sidewalks and demo work

10 Ammonia systems and plumbing

Machine work and UHMW plastic parts

11 Machine work and UHMW plastic parts

12 Light structures and general contracting

03

Welds and machines

Sanitary, purge, stainless steel and aluminum welding, with the CNC equipment to cut and form the parts in house.

Welding

- GMAW
- GTAW
- HELIARC
- SMAW

CNC & forming

- WATER JET
- PLASMA CUTTER
- PIPE BENDER
- PRESS BRAKE
- PUNCHING
