NORTHFRAME · WEBSITE DESIGN

A website concept for Ranchand Welding & Fabrication

An independent design proposal: how your website could look on a desktop screen and on a phone.

- "A leader in welding & fabrication to oil and gas producers" on a dark contour-map background, next to your trench photo
- A pipeline runs down the page edge; its valves turn open as visitors reach each section
- Pipeline, facility and maintenance work in your own words, your safety qualifications, and both yards, Andrews and Williston

This is a design preview, not a live replacement for your current site. Services, safety details, addresses and photos come from your current website and would be confirmed with you before anything goes live. Some photos were upscaled for this preview.
