NORTHFRAME · WEBSITE DESIGN

A website concept for Shadow Welding

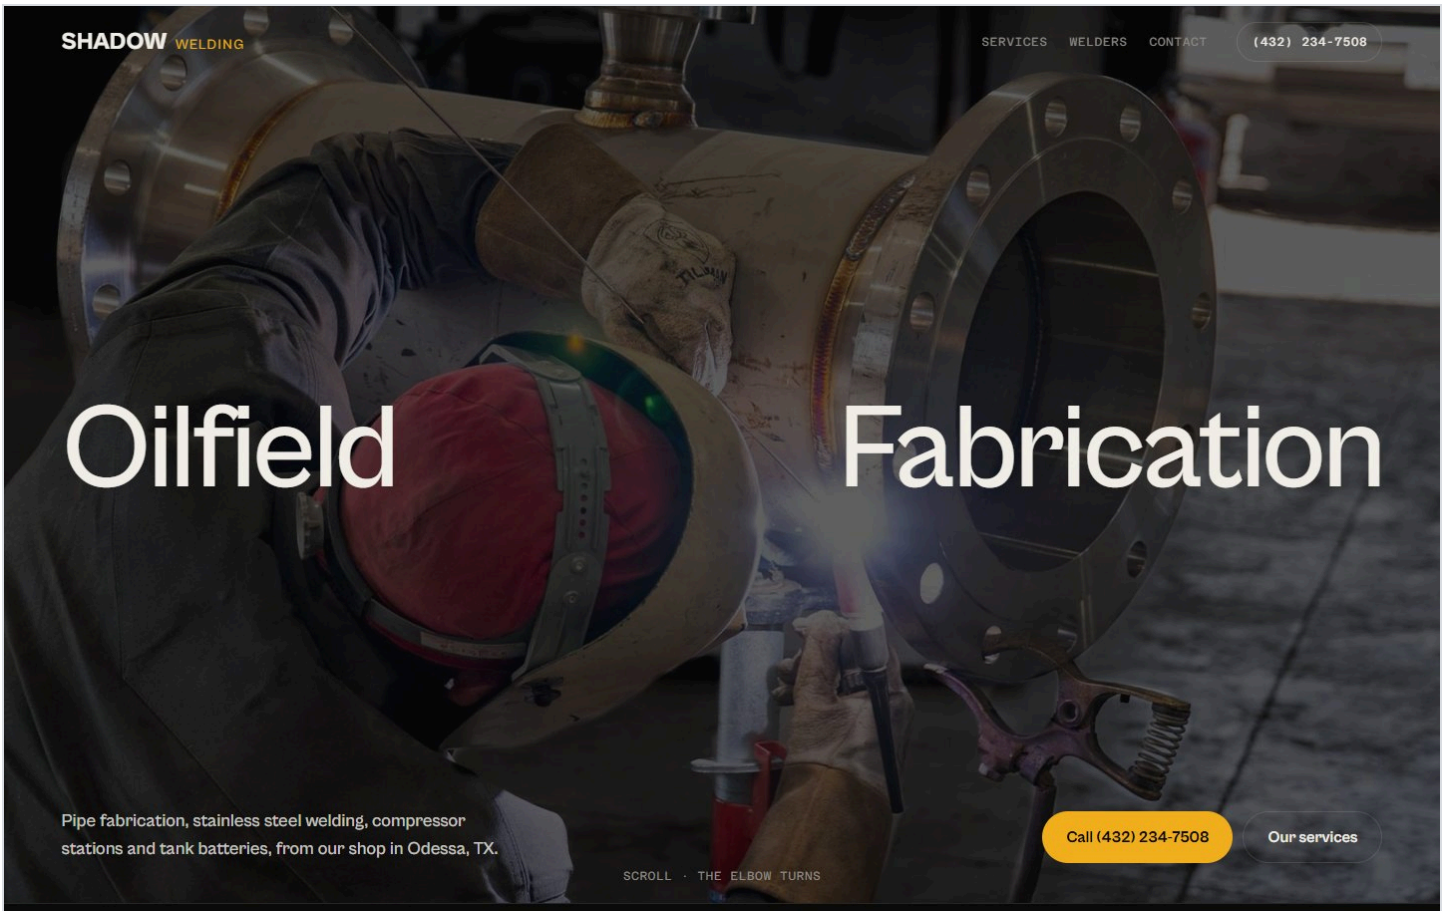

An independent design proposal: how your website could look on a desktop screen and on a phone.

- A 3D pipe elbow in Shadow gold turns between the words "Oilfield" and "Fabrication" as visitors scroll
- "On time and within budget" as the first statement, then your four services as stacked cards with your own photos
- Your TIG and MIG certified welders, the shop on JP Teal Drive and the phone number in large type

This is a design preview, not a live replacement for your current site. Services, wording and photos come from your current website and would be confirmed with you before anything goes live. Some photos were upscaled for this preview.
