NORTHFRAME · WEBSITE DESIGN

A website concept for Precision PowderCoat

An independent design proposal: how your website could look on a desktop screen and on a phone.

- "Show quality powder coating." as a dark showroom page with numbered chapters
- A light follows the cursor across your show bikes (on a phone it moves with the scroll)
- Automotive, household and industrial work, the father-and-son story since 2000, and the phone number in large type

This is a design preview, not a live replacement for your current site. Services, story, numbers and photos come from your current website and would be confirmed with you before anything goes live. Some photos were upscaled for this preview.
