

A website concept for David's Barbecue

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone number and menu one tap away on a phone
- Five generations told as a scroll story, from Oak Cliff in 1910 to Pantego today
- Your full menu with prices, your hours and the catering contact up front

This is a design preview, not a live replacement for your current site. Texts, photos, menu and history come from your current website and would be confirmed with you before anything goes live.
