

A website concept for DFW Granite

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone number and a free estimate one tap away on a phone
- A polished stone surface that catches the light under the cursor, and a stone picker for granite, marble, quartz and more
- Your kitchens, your awards and Michele's 25+ years of experience up front

This is a design preview, not a live replacement for your current site. Texts, awards, reviews and photos come from your current website and would be confirmed with you before anything goes live. Kitchen photos were upscaled for this preview; the stone surfaces are drawn.
