

A website concept for Funky Town Donuts

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone number for orders one tap away on a phone
- Donuts that drop in and spin as visitors scroll, in your mint and pink
- "Say it with donuts": visitors tap a word and see your own letter donuts, plus pick-up, delivery and catering

This is a design preview, not a live replacement for your current site. Texts, family story and photos come from your current website and would be confirmed with you before anything goes live. Some smaller photos were upscaled for this preview.

Made with love

A FAMILY THAT DOES DONUTS.

Brandon grew up in Denton at big family feasts, waiting to see what dessert his aunts had made. He saw a need in Fort Worth for a gourmet donut shop with a different twist, so he talked his mom and his wife into joining the team.
