Design rooted in community

02 / THE EXPERIENCE

A logo that opens into the work.

The opening turns conduit's wordmark into a window across seven project photographs. As visitors scroll, the image strips narrow into the brand mark and the logo settles into the header.

From there, the portfolio moves through a horizontal project track, followed by the studio's approach, team and contact details.

711 N. Tennessee Street
McKinney, TX 75069

conduitad.com

Designed around the real studio.

A calm, editorial interface gives conduit's civic, commercial and community projects room to lead. Clear navigation keeps projects, approach, studio and contact within easy reach.

This is an independent design proposal by Nathanael Gutperl at Northframe. It was not commissioned by conduit architecture + design. Company text, logo and project photography are used in this private concept preview; project facts should be confirmed before publication.

NORTHFRAME

Website design for considered brands.
