NORTHFRAME · WEBSITE DESIGN

A website concept for Burleson Monuments

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone numbers, hours and directions one tap away on a phone
- A gentle memorial preview: families pick a style and type a name, and see it on the stone before they call
- Your promise up front: no sales pressure, a drawing with every order and cemetery paperwork at no extra charge

This is a design preview, not a live replacement for your current site. Texts, categories, testimonials and photos come from your current website and would be confirmed with you before anything goes live. Catalog photos were upscaled for this preview; the stone preview is drawn.
