NORTHFRAME · WEBSITE DESIGN

A website concept for Fred Cheek Monuments

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone number, hours and both detour routes one tap away on a phone
- "Since 1928" carved into a granite slab, letter by letter, on the first screen
- Three generations, your workshop process and your own memorial galleries in one calm page

This is a design preview, not a live replacement for your current site. History, texts, testimonials and photos come from your current website and would be confirmed with you before anything goes live. Gallery photos were upscaled for this preview.
