NORTHFRAME · WEBSITE DESIGN

A website concept for Harvest Moon Taxidermy

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone number and directions one tap away on a phone
- A moon that grows from crescent to full as visitors scroll, and your mounts shown like museum pieces with labels
- Your "I got my deer, what now?" advice as four clear steps, plus what you take and what you don't

This is a design preview, not a live replacement for your current site. Texts, FAQ answers and photos come from your current website and would be confirmed with you before anything goes live. Species labels are read from the photos.

I GOT MY DEER! WHAT NOW?

From the field *to the wall.*

Firstly, congratulations. For the best mount possible, your animal needs to be frozen as soon as possible.

01 **Freeze it fast**
After death, bacteria start to break down the skin. Without freezing in time, hair or feathers slip and leave bald spots that can rarely be fixed.

02 **Bag it, keep it dry**
Wrap your trophy in a trash bag or plastic bag and avoid long contact with ice or ice water.

03 **Keep it cold**
Until the skin is in a freezer, keep it dry and cold.

04 **Small game whole**
For smaller animals meant as life-size mounts, no skinning needed. Bring them in frozen whole, and do not gut the animal.

WE WORK ON

- ✓ Deer & big game
- ✓ Wild birds
- ✓ Pet birds, domestic or non-native (call for a quote)
- ✓ European skull mounts

NOT CURRENTLY

- ✗ Dogs, cats, guinea pigs & other domestic mammals
- ✗ Reptiles
- ✗ Fish

For pet birds, bring a copy of any paperwork required to own the bird at drop-off. Prices: [price list to confirm].
