

A website concept for Independent Overhead Doors

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone number and free estimate first, one tap away on a phone
- A garage door that rolls up as visitors scroll, built from your own installation photo
- Your family business, A+ BBB rating and American made doors up front

This is a design preview, not a live replacement for your current site. Texts, photos and business details come from your current website and would be confirmed with you before anything goes live. The opening animation is AI-generated from a photo on your current website.
