NORTHFRAME · WEBSITE DESIGN

A website concept for HCS MetalWorks / Ranchman Gates

An independent design proposal: how your website could look on a desktop screen and on a phone.

- "Your idea, cut in steel." next to your forest gate panel, with the 10 x 10 x 20 ft oven and 22+ years right below
- A plasma studio: visitors type a name, a torch cuts it out of a powder coated plate, and the design goes straight into a quote email
- Ranchman Gates, your shop equipment, the metal gifts (owls, monograms, address signs) and the phone number in large type

This is a design preview, not a live replacement for your current site. Services, equipment, wording and photos come from your current website and would be confirmed with you before anything goes live. Some photos were upscaled for this preview.
