

A website concept for Mike's Brake & Alignment

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone number and free estimate one tap away on a phone
- A work light that moves across your shop at night, and the whole shop lights up as visitors scroll
- Brakes, alignment, state inspections and your full service list in one place

This is a design preview, not a live replacement for your current site. Texts, reviews and photos come from your current website and would be confirmed with you before anything goes live. The night image of the shop is an AI-generated illustration based on your own storefront photo.

01 / 03

Brake services

Coming to a full stop is a lot easier when your car has functioning brakes. Brake systems are complicated, so you want them checked by someone who works on them every day.

02 / 03

Alignment & tires

Tire services, repairs and sales, plus alignments that keep your car tracking straight and your tires wearing evenly.

03 / 03

Steering & suspension

Front end, shocks and struts, power steering. No play in your front end, no surprises on the highway.

NOW OFFERING

Texas state inspections

Approved state inspection station. Engine light repairs available. Safety first and always.
