

A website concept for BBN Pest Control

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone number and a quote form one tap away on every screen
- Your motto taken literally: bugs crawl across the page and visitors can squash them
- You two as the founders and all 19 towns you cover, from Benbrook to Reno

This is a design preview, not a live replacement for your current site. Texts, photos and service area come from your current website and would be confirmed with you before anything goes live. Leaves and bugs are drawn illustrations; the list of services is still to be confirmed with you.
