

A website concept for Doc's Records

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Store hours, buying hours and your phone number one tap away on a phone
- A record with your logo as the label that spins with the scroll, and visitors can grab and scratch it
- Your monthly music market with its poster, and a direct line for bands to book a slot

This is a design preview, not a live replacement for your current site. Hours, contacts, logo and the market poster come from your current website and would be confirmed with you before anything goes live. The genre list is a placeholder.
