

A website concept for Mobile Dog & Cat Grooming

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Call or text one tap away on a phone
- Soap bubbles that visitors can pop over the first screen, and a grooming checklist that ticks itself off as they scroll
- Your towns, cats, training and pet waste removal laid out clearly, with your own photos of happy clients

This is a design preview, not a live replacement for your current site. Texts, services, towns and photos come from your current website and would be confirmed with you before anything goes live. The smaller gallery photos were upscaled for this preview.
