

A website concept for Structured Foundation Repairs

An independent design proposal: how your website could look on a desktop screen and on a phone.

- A camera ride as visitors scroll: the house comes apart and the camera moves down to the foundation
- The warning signs and repair services from your website appear right on the parts of the house and foundation
- Your free inspection one tap away on a phone

This is a design preview, not a live replacement for your current site. Texts and business details come from your current website and would be confirmed with you before anything goes live. The house and foundation scenes are AI-generated concept visuals, not photos of your work.

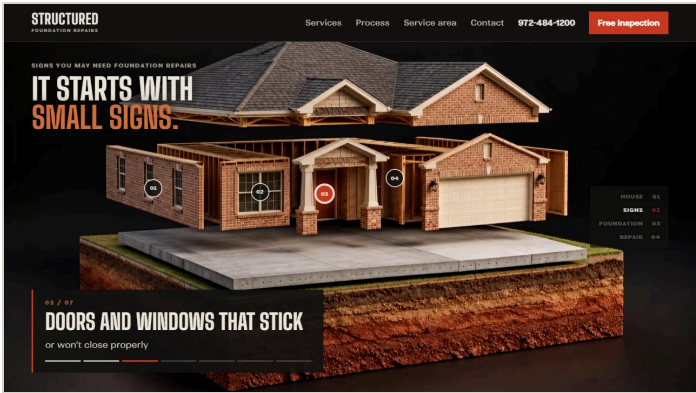

Nathanael Gutperl · Northframe

hello@northframesites.com · northframesites.com

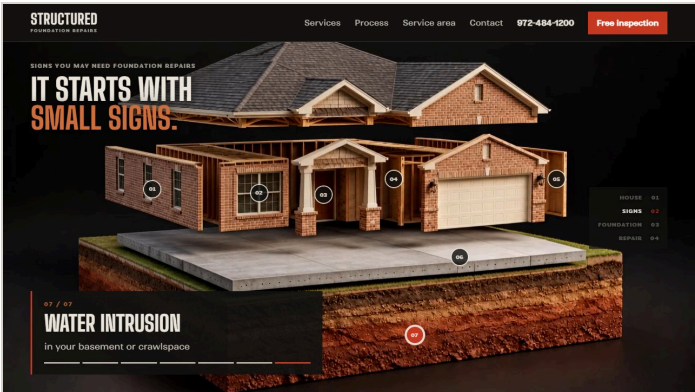

Adalbert-Stifter-Straße 31b, 65232 Taunusstein, Germany

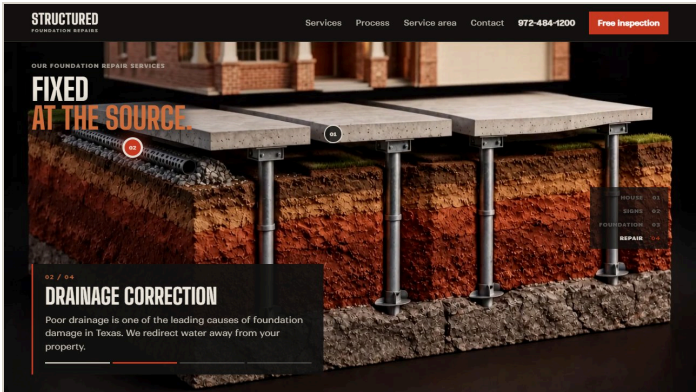

01 · As visitors scroll, the house comes apart

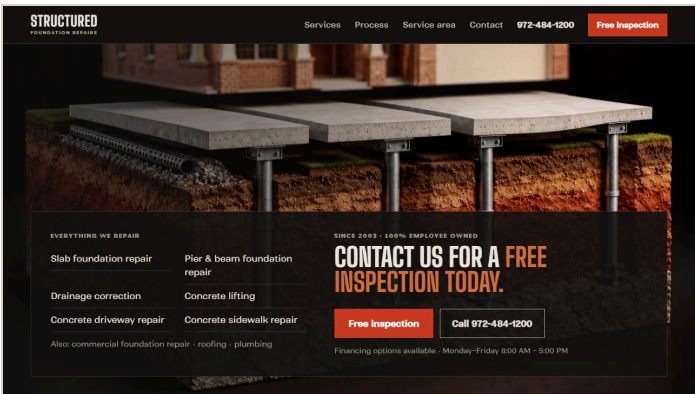

03 / 07 · Warning signs sit on the parts of the house

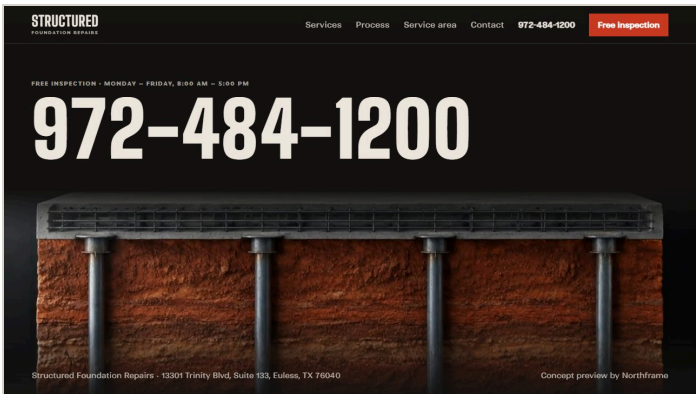

07 / 07 · ... and the last sign closes the chapter

02 / 04 · Repair services sit on the parts of the foundation

Your free inspection, one tap away

The page ends on your phone number above a short film of the foundation

FOUNDATION REPAIR • DALLAS-FORT WORTH

BUILDING A FOUNDATION OF TRUST SINCE 2003.

Slab and pier & beam foundation repair, drainage correction and concrete lifting for homes and commercial buildings across the DFW Metroplex.

Free inspection

Call 972-484-1200

100% EMPLOYEE OWNED

SIGNS YOU MAY NEED FOUNDATION REPAIRS

IT STARTS WITH SMALL SIGNS.

01

Cracks in exterior bricks
or separation between the bricks and the home

02

Gaps around door frames or windows

03

Doors and windows that stick
or won't close properly

04

Cracks in walls or ceilings

05

Counters or cabinets pulling away from the wall

06

Uneven or sloping floors

07

Water intrusion
in your basement or crawlspace

COMPREHENSIVE EVALUATIONS

WE FIND THE ROOT CAUSE.

IF YOU DON'T HAVE A PROBLEM, WE WILL
TELL YOU.

OUR FOUNDATION REPAIR SERVICES

FIXED AT THE SOURCE

AT THE SOURCE.

01

Slab foundation repair

Slab foundations are prone to moisture changes. We assess the problem and create a repair plan tailor made to your property.

02

Drainage correction

Poor drainage is one of the leading causes of foundation damage in Texas. We redirect water away from your property.

03

Concrete lifting

Settled driveways, sidewalks, patios and pool decks raised back to their original position.

04

Expansive clay soil

More than two decades in North Texas: we know how its expansive clay soil affects foundations.

EVERYTHING WE REPAIR

BUILDING A FOUNDATION OF TRUST IN THE DFW METROPLEX

Foundation problems can turn your dream home into a source of stress. Cracks in the walls, uneven floors or doors that won't close properly are signs that something's wrong beneath your feet.

01 · SERVICES

OUR FOUNDATION REPAIR SERVICES.

01

SLAB FOUNDATION REPAIR

Slab foundations are common in Dallas, Fort Worth and surrounding areas, but they're prone to moisture changes which can lead to foundation movement. We assess the extent of your problem and create a repair plan tailor made to your property's conditions.

02

PIER & BEAM FOUNDATION REPAIR

Pier-and-beam foundations require another level of evaluation: in addition to a visual inspection and an elevation survey, a full crawl space evaluation and an inspection of the wood members.

03

DRAINAGE CORRECTION

Poor drainage is one of the leading causes of foundation damage in Texas. Water pooling around your home can cause foundation upheaval. We install drainage systems that redirect water away from your property.

04

CONCRETE LIFTING

Settled concrete flatwork creates tripping hazards. Concrete lifting raises it back to its original position, for driveways, sidewalks, patios and pool decks.

05

CONCRETE DRIVEWAY REPAIR

Cracks filled, sunken sections lifted and the slab's consistency restored.

06

CONCRETE SIDEWALK REPAIR

Cracks, settling and uneven surfaces fixed for safe walkways. Cities are often responsible for portions of your sidewalk, so check with your local city office first.

Also: commercial foundation repair, roofing services, plumbing services and financing options.

02 • WHY STRUCTURED

WHY CHOOSE STRUCTURED FOUNDATION REPAIRS.

100% EMPLOYEE OWNED

All employees have a vested interest in the success of your repairs.

LOCAL EXPERTISE

Serving Dallas, Fort Worth and North Texas for more than two decades, with a clear understanding of the region's expansive clay soil.

COMPREHENSIVE EVALUATIONS

Thorough and honest evaluations that find the root cause. If you don't have a problem, we will tell you.

HIGH-QUALITY MATERIALS

Designed to withstand Texas weather conditions and provide long-lasting results.

EXPERIENCED WORKFORCE

Trained for both residential and commercial foundation repair projects.

CUSTOMER FOCUS

From the first inspection through the final repair, communication every step of the way.

03 • PROCESS

A CLEAR

THREE-STEP PROCESS.

STEP 1

EVALUATION

Every project begins with a detailed foundation evaluation. Based on the findings, a customized repair plan.

STEP 2

THIRD-PARTY ENGINEERING REPORTS

Where appropriate, a third-party engineer reports before the repairs that the plan is reasonable, and again afterwards that the work meets engineering standards.

STEP 3

REPAIRS

Permits from the local municipality, utility lines marked, and the right repair method, with every care to minimize disruption to your routine.

WE SERVE THE ENTIRE DFW METROPLEX
