

A website concept for Studio of MoveMINT

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your classes and email one tap away on a phone
- Stage photos of your dancers drifting past at different depths
- A class finder: parents tap their dancer's age and see where to start

This is a design preview, not a live replacement for your current site. Texts, classes, prices, dates and photos come from your current website and would be confirmed with you before anything goes live. Phone number, street address and the parent portal link are still to be added. Photos of your dancers are shown only to you.
