

A website concept for Arlington Natural Wellness Center

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your phone number and new patient steps one tap away on a phone
- Dr. Hickey, your services and your new patient paperwork on one calm, clear page
- Your hours, address and a simple way to ask Dr. Hickey a question

This is a design preview, not a live replacement for your current site. Texts and photos come from your current website and would be confirmed with you before anything goes live. Patient testimonials are still to be added.
