

A website concept for Hector Torres HVAC

An independent design proposal: how your website could look on a desktop screen and on a phone.

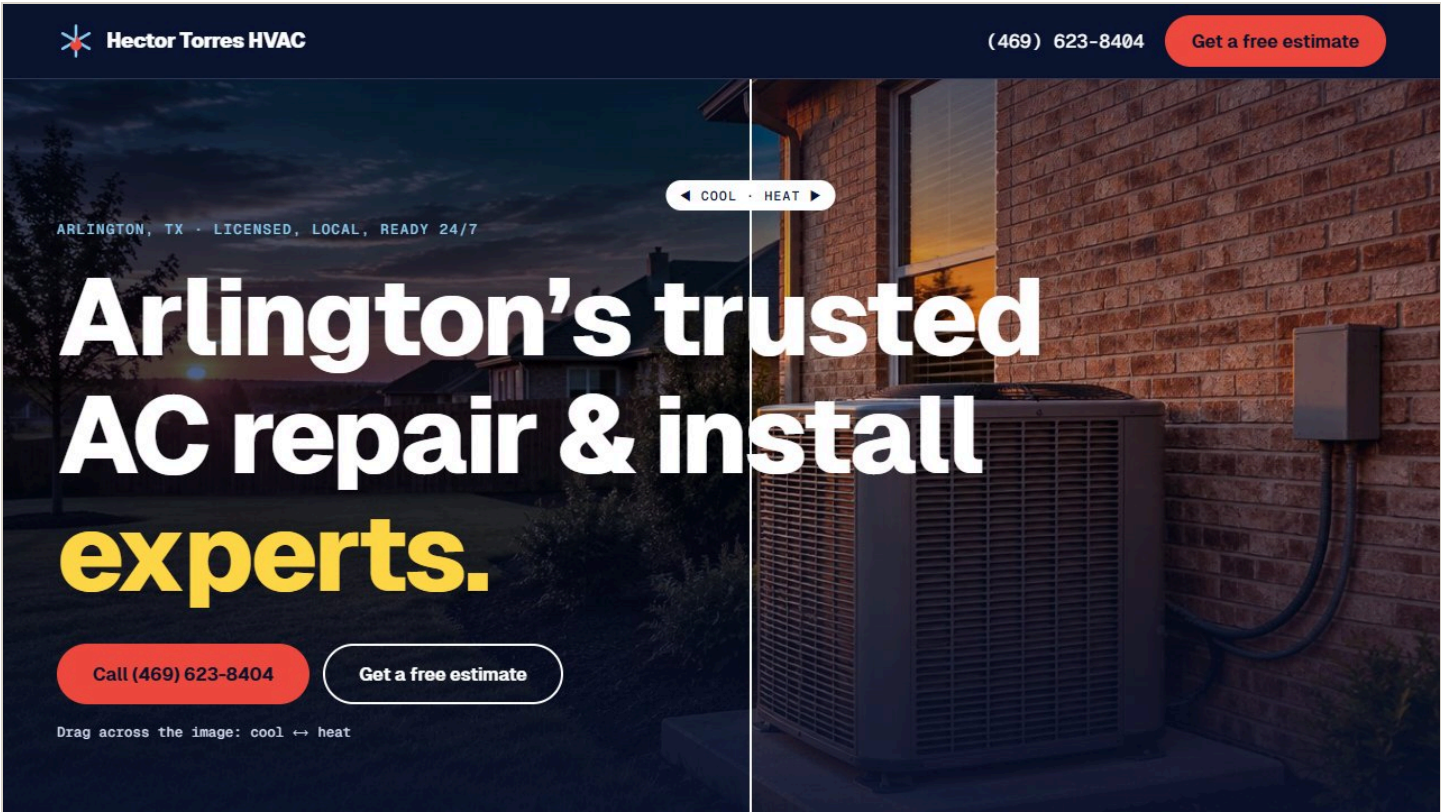

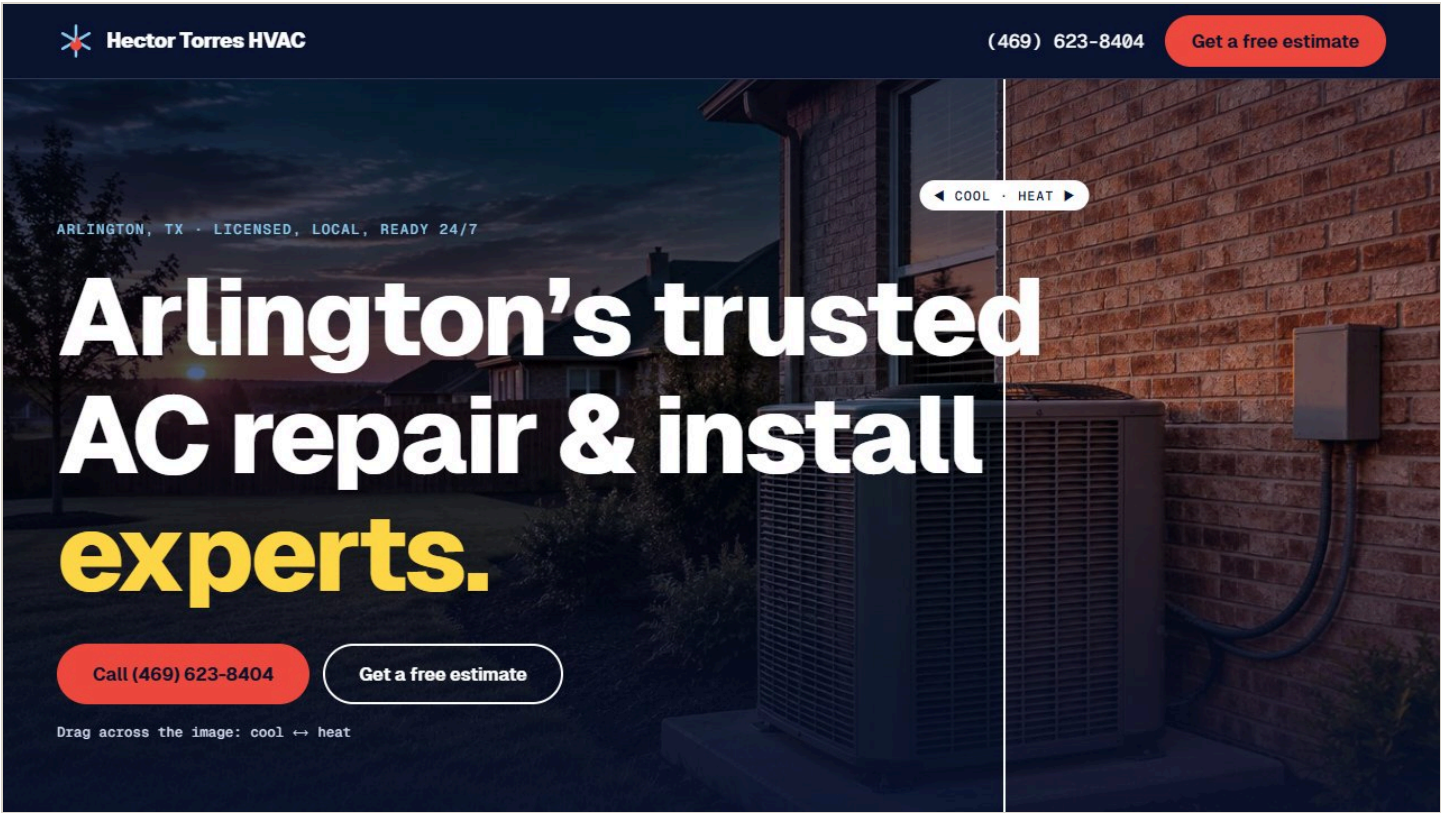

- A cool/heat slider on the first image that visitors can drag from cool to warm
- Your services, the 10-year warranty on new systems and your 24/7 emergency number in clear blocks, next to the job photos from your website
- Call and free estimate always one tap away, on a desktop screen and on a phone

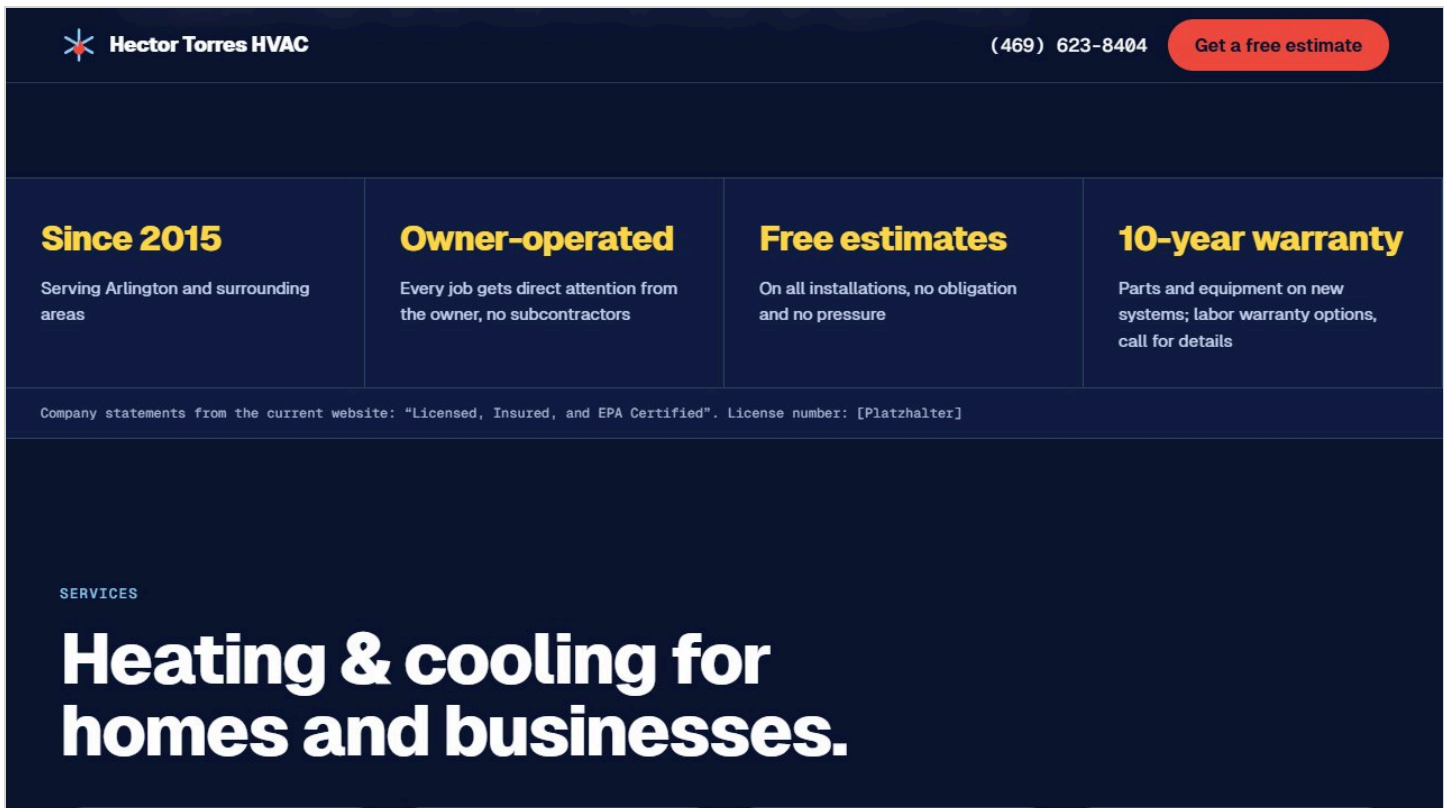

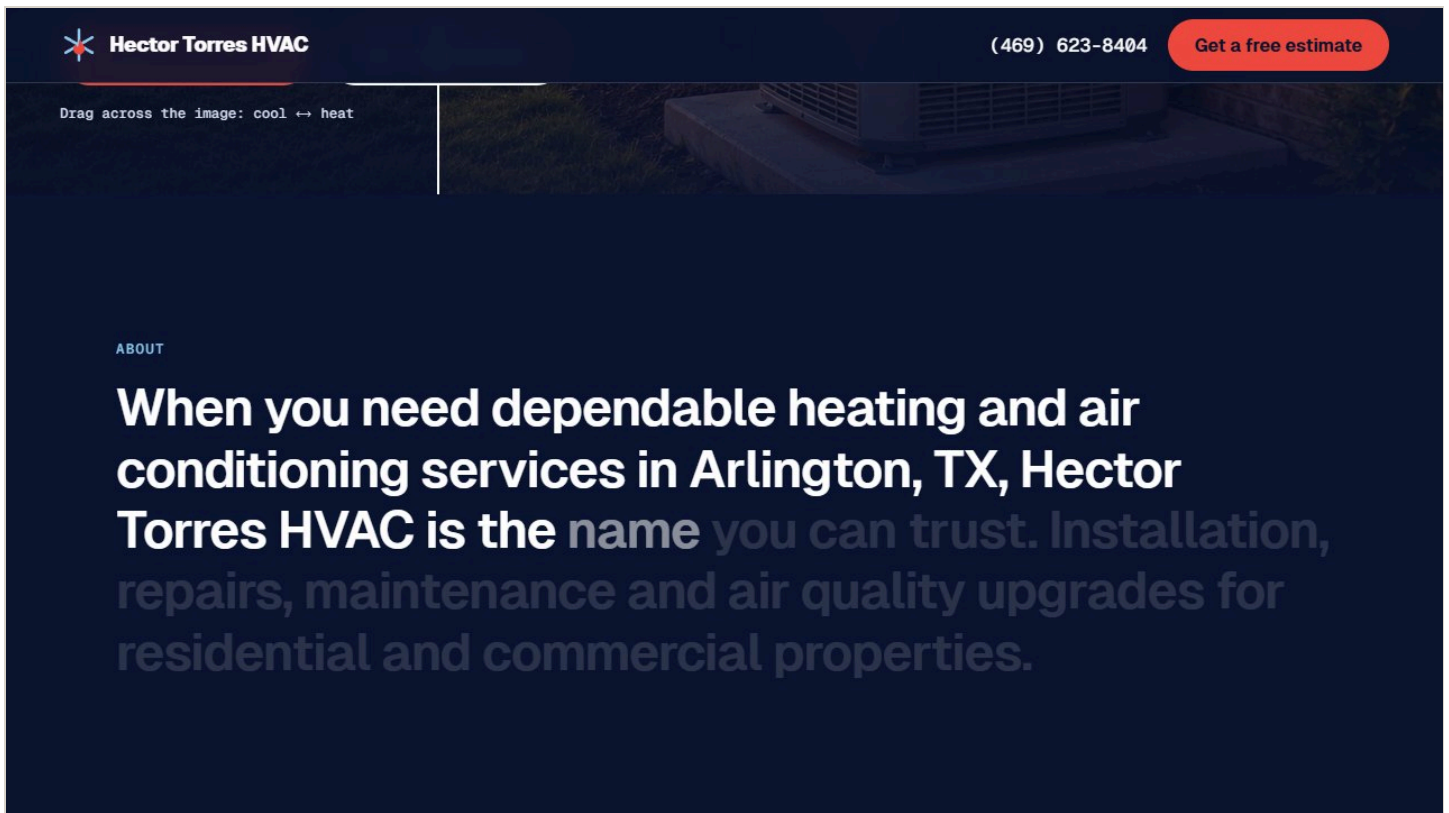

This is a design preview, not a live replacement for your current site. Texts and business details come from your current website and would be confirmed with you before anything goes live. The hero image is an AI-generated concept visual, not a photo of your work. The job photos are from your current website.
