

A website concept for Just Right Air & Heat

An independent design proposal: how your website could look on a desktop screen and on a phone.

- A loud, readable first screen: your logo large, a big headline and two clear buttons, book online (\$10 off) and call
- Your services as cards that scroll sideways, plus the spring and fall tune-up packages
- Service area, opening hours and online booking together at the end of the page

This is a design preview, not a live replacement for your current site. Texts and business details come from your current website and would be confirmed with you before anything goes live. The technician image is an AI-generated concept visual, not a photo of your work. The logo is from your current website. Your current site shows two phone numbers (817-966-7753 and 817-966-7793); the preview uses 817-966-7793 until you confirm.
