

A website concept for Ft Worth Fence & Patio

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your own cedar fence photo as a moving hero that plays as visitors scroll
- Fence types and outdoor living projects laid out like a build sheet
- A free on-site estimate and calling you easy to find on a phone

This is a design preview, not a live replacement for your current site. Images and business details come from your current website and would be confirmed with you before anything goes live. The moving hero is made with AI from your own photo. The estimate form is a design preview and does not send requests.
