

Bush Architects

An independent website concept

A considered digital home for your architecture.

A clearer way into the work.

The concept frames Bush's Trinity Groves rendering with a restrained drawing-board treatment, then gives the portfolio room to breathe.

- **Architectural drawing language**

Fine guides and measured labels frame the featured project.

- **Portfolio navigation**

Project cards and a compact project index support browsing.

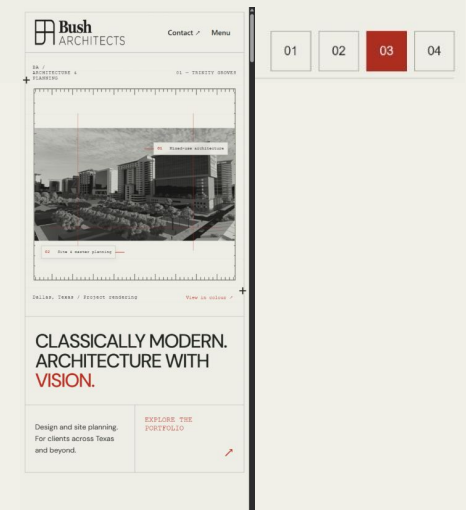

- **Straightforward contact**

The Dallas contact route stays visible and easy to reach.
