

Magee Architects

An independent website concept

A considered digital home for your architecture.

THE CONCEPT

A clearer way into the work.

The concept leads with Magee's project imagery, then lets visitors explore work by category with the red studio accent carrying through the page.

- **Project-led opening**

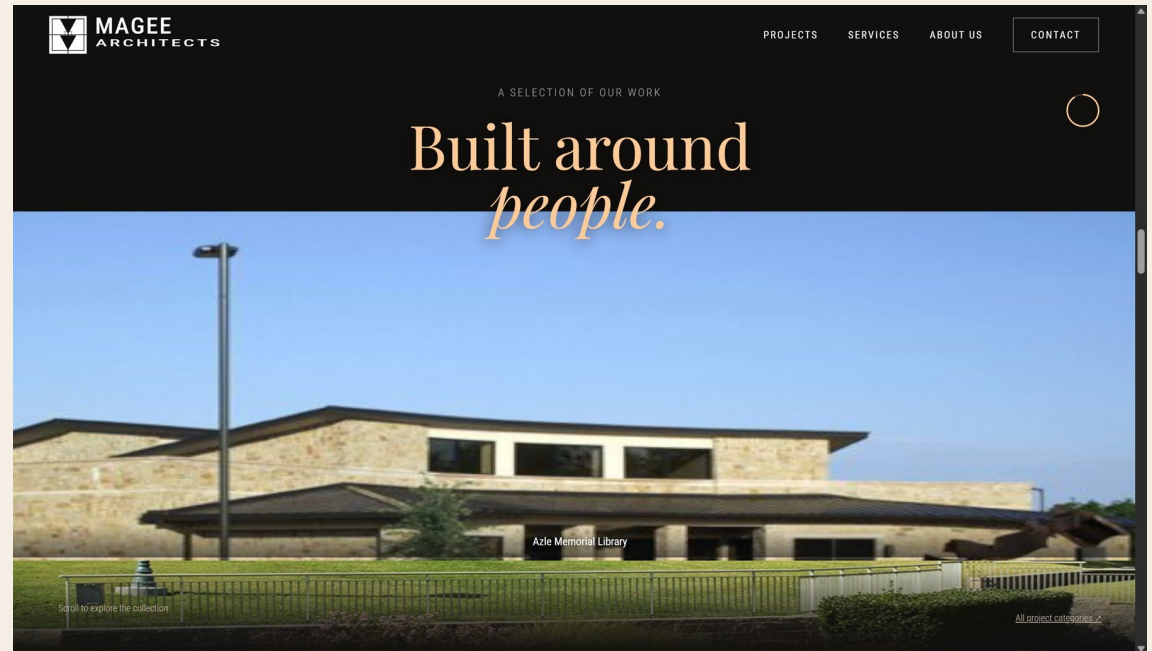

A clear first impression built around the firm's own architecture.

- **Organized portfolio**

Project categories make a substantial body of work easier to explore.

- **Direct contact**

Phone and email remain easy to find as visitors move through the page.

RESPONSIVE DESIGN

The page adapts for small screens. A current phone screenshot was not included in this preview.
