NORTHFRAME · WEBSITE DESIGN

A website concept for Kittner & Pate Design Associates

An independent design proposal: how your website could look on a desktop screen and on a phone.

- Your free consultation, phone number and both emails one tap away on a phone
- One of your own floor plans turns into the finished building as visitors scroll
- Architecture and interiors side by side, with a project index that opens row by row

This is a design preview, not a live replacement for your current site. Texts, services, drawings and project photos come from your current website and would be confirmed with you before anything goes live. Project names are left for you to fill in; some photos were upscaled for this preview.
