A website direction for Burgess Fabrication

Precision fabrication, with the process in view.

Capabilities, made clear

Desktop concept / actual browser view

Work, material and detail

03 / THE APPROACH

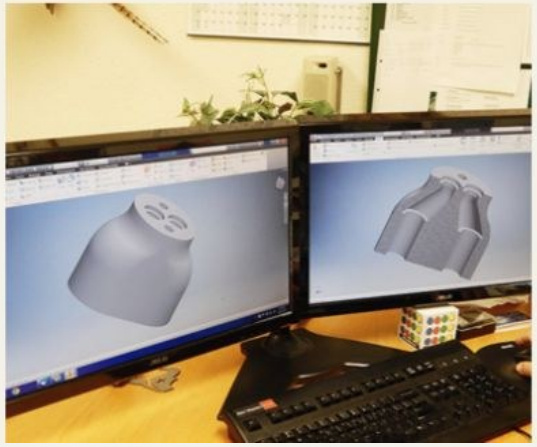

A clearer path from *idea to inspection.*

Burgess describes its work through business development, design, and quality assurance. Here is what each stage means for a prospective project.

A PART'S PATH

01

02

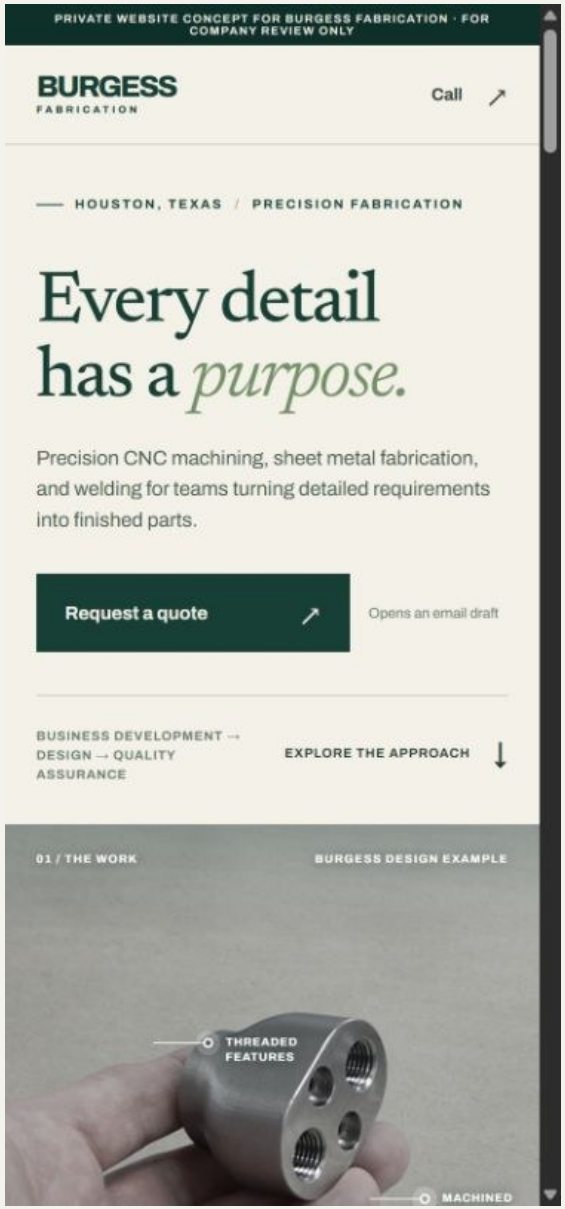

01 / BUSINESS DEVELOPMENT

Start with the *requirements.*

Bring the drawing, material, quantity, and questions. Burgess's business development team is the first contact for a quote and helps align the project with an approach to making it.

Company imagery / private presentation only

A clear route on mobile

Precision fabrication, with the process in view.

A part-led introduction connects machining, fabrication and the path from requirements to inspection.

The concept adapts to a narrow screen, with readable service information and a visible next step for an inquiry.
